

Health and Safety Policy

Catalyst Handling Resources is committed to conducting business with the goal “Zero Harm” to all stakeholders. We will do this by providing a safe work environment, safe systems and people who work safely.

The Director has ultimate responsibility for the implementation of this policy, supported by the management team, who are accountable for the execution of this policy within their areas of responsibility. However, Catalyst Handling Resources recognizes that all parties have an obligation to ensure the health and safety of all stakeholders.

The foundation of our commitment is that no business objective will take priority over health and safety and that no task is so urgent that it cannot be done safely.

Catalyst Handling Resources is committed to compliance with the relevant State or National OSHA legislation, regulations, standards, and codes of practice.

Through consultation with stakeholders, we are committed to the continuous improvement of our equipment, management systems and work environments while maintaining the highest level of safety. All incidents are reported and investigated, so the corrective actions taken can be shared.

This policy will be implemented through the companies integrated management system. Objectives and targets will be established and reviewed through consultation with our people and management to enable continuous improvement of our OHS performance.

This policy will be made available to stakeholders, reviewed periodically by the Director to ensure its continued relevance to the organization.

Richard Visscher
Director
